SUMMARY

Enthusiastic and motivated B.Tech student in Computer Science and Engineering with a keen interest in Java programming. Experienced in developing real-world projects, demonstrating a strong foundation in problem solving and Web development. Seeking opportunities to apply skills and contribute to innovative solutions.

EDUCATION

- Galgotias University, B-Tech in (CSE)** Oct 2023 - Present
Greater Noida , Uttar Pradesh.
- Saraswati Vidya Mandir Sr. Sec. School** April 2019 - May 2022
12th from Central Board Secondary Education .
10th from Central Board Secondary Education .

TECHNICAL SKILLS

- Languages:** Java Programming, OOPS, Python.
- Frontend:** HTML, CSS, JS, React.js, Tailwind CSS and Responsive Design.
- Backend & Databases:** Node.js, Express, MongoDB, MySQL
- Tools & Platforms:** Git/GitHub, VS Code, AWS, Jupiter Notebooks, MS Excel, Word, PowerPoint.

SOFT SKILLS

- Teamwork, Communication, Problem-Solving, Leadership.

PROJECTS

- JOB PORTAL** Mar 2024-Aug 2024
 - Designed and developed an interactive frontend interface for seamless user experience between job seekers and employers.
 - Implemented responsive UI components for job browsing, application submission, and user authentication.
 - Ensured smooth integration with backend APIs to display real-time job listings and application status.
- i-Rail Connect:** Sep 2025-Oct 2025
 - Worked as a frontend developer in a team project to build RailSched.AI, an AI-powered railway scheduling system focused on optimizing timetables and reducing delays.
 - Collaborated with the team to develop responsive and scalable frontend interfaces using React (TypeScript) and Tailwind CSS, enabling real-time updates via WebSockets.
 - Partnered with backend and AI team members to create interactive dashboards and map-based visualizations using Chart.js and Mapbox.

INTERNSHIP

- Artificial Intelligence Intern, Edunet Foundation** Dec 2024-Feb 2025
 - Developed a human pose estimation model using deep learning (CNNs, OpenPose) to track body keypoints in images and videos.
 - Implemented and fine-tuned HRNet and MediaPipe to improve accuracy for real-time applications.
 - Preprocessed and annotated datasets, optimizing training pipelines for pose detection using Python, TensorFlow, and PyTorch.

CERTIFICATION AND ACHIEVEMENT

Certificate:

- Python (Infosys), Introduction to Generative AI (Google cloud).

Achievement:

- I have solved 200+ Problems on Leetcode [\[Link\]](#)
- Our team was selected at the university level for Smart India Hackathon (SIH) 2025.
- Campus Ambassador at Unstop, representing my institution and promoting nationwide hackathons, challenges, and learning opportunities.
